Dear Erick,

I honestly thought this had been thrown out in 2017 when I communicated with the Attorney General's Office. Since the time I was Treasurer of this committee I have worked for 2 different organizations and after reviewing my old emails it is hard to recollect what exactly what happened during this time. My daughter was born in December of 2015 and is now 5 years old. I believe this committee was formed before that time. I was Treasurer of an organization that had few transactions and to my knowledge I did not violate any PDC rules or regulations while filing this information. I have no idea how the poll was communicated to anyone as I just handled the filing of the few transactions that occurred.

The complaint should have been thrown out years ago because none of the candidates in the poll ran for office or ever filed a campaign committee to run for office. Glen Morgan claims in his complaint their should have been an in-kind filed but I do not know how that would have been possible with no mayoral campaigns being filed to run against than mayor David Condon. I am also unclear how an in-kind would have been reported without an official mayoral campaign committee set-up. If this is the case all 3 potential candidates should have set-up campaign committees for mayor in the effort to report the in-kind donation and than rapidly closed them.

Again I would like to stress that I think this is a frivolous complaint and that I only reported a few transactions for something that occurred 5 years ago the birth of my 5 year old daughter and since that time I have had 2 full-time jobs.

Sincerely,

Nick CastroLang
