My response to PDC Case Number 56012:

The complainant is correct, Portland is in Oregon, not Washington.

The previous donation that was entered in ORCA was from a Washington donor, and ORCA by default pre-fills the new contact state field with the previously used state. This makes it easy to mistakenly log an incorrect state. As there is no city or town called "Portland" in Washington, and the Oregon donor's employer is (correctly) listed as Oregon Health & Sciences University, it seems clear that there was no intent to deceive.

This error will be corrected in an amended C3 later today.

Thank you for the opportunity to respond to this complaint.
