Good morning Erick,
I did not receive any calls, text or emails from the filer assistance team.
The issue I am running up against is that ORCA was a computer based program back in 2018 and just the reports were uploaded.
It would seem that the new system is a web based system and I have not had any luck logging into it.
I would like to resolve this issue well before your 1 October date.

I did take the filer training several time over the years and nowhere were we told about this requirement of reporting how many signs or pieces needing to be reported. I have also looked through many other candidates c4 reports and have not found a single example. Additionally, the ORCA system did not have a spot to include this information at the time.

I believe most candidates want to do the right thing in their reporting requirements. Is there not a way the PDC could provide better instructions??? Maybe a box in the system labeled how many signs, date of ad, or number of robo calls..   Seems to me you could save yourselves some time as well.

Leonard Christian
