We run a telegram page that screenshots all the horrible things are public officials have done. Since when does that make us a public committee? We have not taken money for signs or any political contributions. I'm not exactly sure what we have to disprove. The two people that complained are part of the camas progressives Facebook which elected official Donna Sinclair is part of. She has harassed multiple people in the community. none of us are politicians or running for office ..

Should we in return report them and play this little game? Should we really turn in a Facebook page because they go after Republicans with their personal opinion of who to vote or not vote for ?

Washougal Mom's is not a corporation or an organization that's non profit or for profit, we are just a telegram page run by a whole lot of people in the community that takes screenshots of what our city is doing.

This is Donna Sinclairs doing, the two complainers at her personal friends and both are teachers. Donna is a school board member. She's up for re-election and has harassed a lot of parents in this community who are pissed off at her. This does not make anyone a political action committee. All this means is that she abuses her constituents.
