Casey,

We are aware of the updates that took place later in 2024 but those forms appeared to us to have rolled out after our campaign had ended. The post you linked is dated after our first report was completed on January 3, 2024 and it doesn't appear the new forms were available until at least April or May. So just want to confirm that we're not required to go back and amend since those were not available until after the completion of this campaign.
