Thank you for making Local 2694 aware of this issue, we strive to always follow the laws and regulations as required in our political action endeavors. IAFF Local 2694 was made aware of the signage issue well before this complaint was filed. By the time the alleged violation complaint was filed, Local 2694 had already taken steps to remedy the situation. We have, since learning of the issue, added all required information to our signs, while also following the size requirements. The signs that IAFF Local 2694 uses were all purchased long ago, well before the new regulatory requirements of including this new information on the signs. Stickers have been ordered to ensure that any additional sign used in the future will also be in compliance with all current regulations. Local 294 spoke on the phone with representatives from the PDC, who assured us that all actions as described above would make us compliant with all current applicable regulations. Unless we hear otherwise, we will assume that our actions taken will be sufficient in remedying this alleged violation complaint.

Respectfully,

Chris Jorve

President

IAFF Local 2694
